

WE ARE R&D

# POWERING THE FUTURE OF PRINT

## Speed. Simplicity. Profitability.

Memjet's easy-to-use, high-speed color printing technology delivers unmatched resolution at a remarkably low total cost of ownership, enabling increased productivity, profitability and innovation across an ever-growing range of industries, market segments, and applications.

## Unparalleled Solutions for OEMs.

As the global leader in bringing digital inkjet technology to market through strong OEM partners, Memjet® creates a strategic advantage with our modular technology and dedicated team of experts for creating software, hardware, and mechanical design as well as building joint marketing campaigns to promote your product.

 **Seeing is Believing.**

**Beautiful Precision, Simplicity, and Affordability.**

**The Future of Print:**

# THREE TECHNOLOGY PLATFORMS. INFINITE POTENTIAL.

**VERSA**PASS®  
BY MEMJET™

**Blazing fast speed. Simple integration. Superb profitability.**

VersaPass®, Memjet's original technology platform, continues to provide unique value by delivering an unmatched combination of quality, speed and affordability in an aqueous dye-based, single-pass digital print system that enables on-demand printing for a variety of markets including desktop labels, mailing and addressing, wide format and commercial press.

- Complete engines or components set
- Speeds up to 18 m/min 60 ft/min
- 1067 mm / 42 in max print width
- Up to 1600x1600 dpi, with up to 5x nozzle redundancy

**DURA**LINK®  
BY MEMJET™

**Industry-leading speed. Modular simplicity. Commercial competitiveness.**

DuraLink® features a new longer life printhead, durable pigment ink, and impressively versatile modularity. Targeting a broader range of commercial, packaging, and industrial printing markets, DuraLink provides the ultimate flexibility in building market-leading, high-productivity solutions.

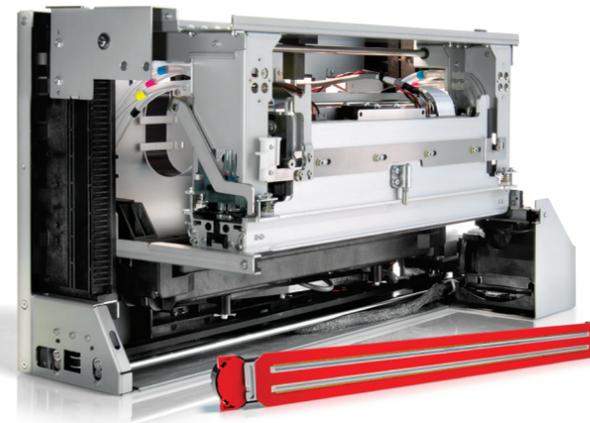

- Flexible modular system
- Speeds up to 203 m/min 668 ft/min
- 2.5 m / 100 in max print width
- Up to 1600x1585 dpi, with 5x nozzle redundancy

**DURA**FLEX®  
BY MEMJET™

**Modular flexibility. Extreme durability. Benchtop affordability.**

DuraFlex® is the newest pigment-based print system with multi-color A4 and A3+ printheads and a modular set of compact components. So now OEMs can build desktop, light commercial and cost-sensitive wide format solutions that enable fast, full-bleed color printing with market-leading durability and image quality.

- Compact modular system
- Speeds up to 46 m/min 150 ft/min
- 1270 mm / 50 in max print width
- Up to 1600x1600 dpi, with 2x nozzle redundancy

## Powering New Markets, Applications and Opportunities

**Office & Document**  
Increase the effectiveness of office communications through color and speed with lower print costs and interventions.

**Labels**  
Open manufacturing doors with short-run color labels on demand. Memjet technology powers fast, high-quality color label systems spanning from desktop to narrow-web press applications.

**Mailing & Addressing**  
Get results with edge-to-edge color envelopes and direct mail. Memjet makes it easier to print on wider and thicker envelopes and direct mail media.

**Commercial Print**  
For high-speed color printing at 1600 dpi with full variable data and near offset print quality—you can now print your commercial applications faster and more profitably than ever before.

**Packaging**  
Evolve your packaging to create a more personalized interaction between consumers and brands. Custom, full-color short-run solutions from Memjet make it possible.

**Wide Format**  
When you have 24-hours or less to print 100+ wide format prints, speed wins. Memjet's ultra-fast wide format technology helps you meet deadlines without breaking the bank.
